WOVEN**FLOORING**BY DICKSON®

WOVEN**FLOORING**

The Dickson Woven Flooring collection stands for expertise and attractive, innovative designs. Priding ourselves on our workmanship, we're convinced of the benefits of innovation and continuously drive the performance of our products.

Our Research & Development team achieves both simple, incremental improvements and revolutionary advances to best meet your needs. The launch today of our CleanGard - Integrated Protection technology - a new technically advanced product arriving at a critical juncture on the highly demanding woven flooring market - is one such example.

Pioneers of optimal protection, we're proud of our teams who have worked tirelessly for the last three years to bring you this varnish, allowing you to enjoy your product with confidence. Besides its acoustic insulation properties, dimensional stability and clean cut, Dickson woven flooring is now even easier to maintain, and this is just the beginning...

INNOVATION DICKSON: INTEGRATED VARNISH PIONEER

WOVEN FLOORING THAT'S MORE **DIRT RESISTANT & EASIER TO CLEAN**

The CleanGard technology adds a varnished overlay to the woven surface, delaying its soiling while enhancing its stain resistance and ease of maintenance.

OPTIMAL PROTECTION

The layer of varnish is integrated directly into the finished product, providing additional protection and ensuring that the material looks the same. CleanGard technology is odourless and contributes to a healthy interior.

THICKNESS

The product maintains its original performance including a total thickness of 4 mm, all layers combined

TRANSPARENCY

CleanGard technology does not affect the appearance of the product, which retains its attractive design

EASY MAINTENANCE

Much easier maintenance for less regular routine cleaning

DICKSON

WOVEN FLOORING

THE LOOK AND FEEL OF TEXTILE WITH **TOTALLY UNIQUE PROPERTIES**

Woven from revolutionary fibres, Dickson® floor covering options combine the remarkable durability of vinyl with the aesthetic appea and texture of traditional carpeting.

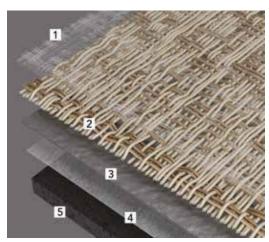

A truly innovative technology developed for the most demanding environments such as hotels, offices, stores and restaurants Dickson flooring is durable, comfortable, attractive, and easy to maintain. This performance is further enhanced by CleanGard technology: a layer of varnish incorporated into the woven wea surface for added protection and easier cleaning.

VARNISHED WOVEN WEAR SIDE

- 2. Monofilament polyester core
- 3. Very high density foam
- 4. Fibreglass layer
- 5. Acoustic foam

GLOBALLY RECOGNIZED **QUALITY**

Crown jewel of the technical textile industry, Dickson is now recognized the world over as the benchmark for supreme quality indoor and outdoor French-made fabrics. Its products, marketed under two flagship brands, DICKSON® and SUNBRELLA®, are used by the top names in design, architecture and boating.

The group's main growth engine—innovation—enables Dickson to constantly provide a diverse array of products and a wide range of technical and designer textiles, all aimed at improving people's homes and work environments. The company currently provides solutions for four key markets: solar protection, outdoor living spaces, indoor and outdoor decoration, and boating equipment. A combination of technical expertise and creativity, the Dickson style shines in more than 110 countries on 5 continents.

MADE IN FRANCE

COMFORTABLE & DURABLE

FLOORS PLAY A KEY ROLE IN THE COMFORT OF A ROOM

To ensure optimum convenience and well-being, our R&D team has created ultra-smart flooring solutions using advanced technology: thermal and acoustic insulation, a non-slip surface that's comfortable to walk on...

EXCEPTIONAL ACOUSTIC INSULATIONCAPABILITIES

A leading-edge innovation, the SoundGuard® technology was specifically designed to improve comfort and noise absorption.

Dickson developed a high performance soundproof backing that effectively absorbs ambient noise and significantly reduces the transmission of impact noise.

Acoustic comfort is truly essential to people's well-being and ideal for offices and hotels.

NON-SLIP SURFACE

The woven structure of Dickson® flooring naturally prevents slipping, making it particularly appropriate for public buildings where safety standards often determine the materials decorators can use.

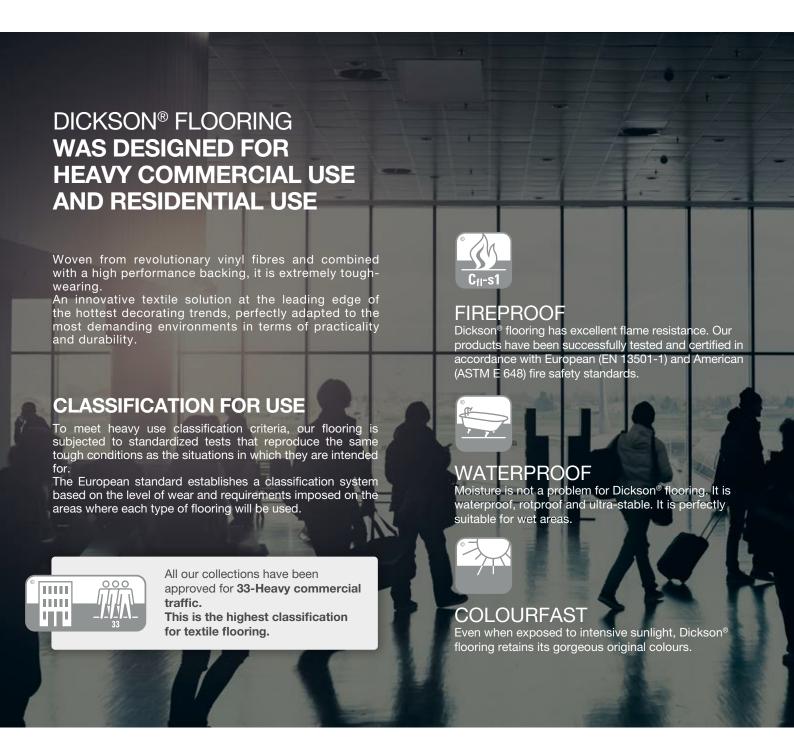

QUALITY THERMAL INSULATION

Good quality thermal insulation can dramatically improve the comfort of a room. Unlike hard flooring, Dickson® flooring offers warmth for greater well-being and energy savings.

ANTISTATIC PROPERTIES

Formulated to minimize static electricity generated from walking on most carpeting, Dickson® flooring solutions provide effective protection against unpleasant shocks.

EASYTO INSTALL & TO MAINTAIN

DICKSON® WOVEN FLOORING IS FAST AND SIMPLE TO INSTALL ON ANY KIND OF SURFACE

Like any other flexible flooring, installation is done by gluing the material directly to any kind of flat, clean, dry, stiff surface. To save time and increase flexibility, you can also install the tiles with a non-permanent glue.

THE FIRST WOVEN VINYL FLOORING ENSURING A CLEAN CUT

The FrayGuard® technology developed by Dickson minimizes the common phenomenon of fraying when cutting carpeting and boosts durability of the weave. It guarantees clean-cut edges for fast, efficient, impeccable installation.

DICKSON WOVEN FLOORING ALLOWS USERS TO ACHIEVE A CLASSIC LOOK OR CREATE ORIGINAL LAYING COMBINATIONS BY MIXING PRODUCTS TO CREATE RHYTHMS, PERSPECTIVES AND REFLECTIONS THAT TRANSFORM INTERIORS DEPENDING ON THE INTENSITY OF THE LIGHT.

STAIN RESISTANT

Dickson® flooring was designed to resist stains by not absorbing liquids and thus making spills quick and easy to clean.

LOW MAINTENANCE

The product takes less time to clean and requires less regular routine maintenance. As with linoleum or tiling, basic cleaning can be done with a vacuum, broom and warm water mixed with a neutral detergent.

SMART TIP

The colour of your flooring directly affects the maintenance requirements. Dirt and stains are less visible on chiné (marbled) shades than solid colours (whether light or dark). Depending on the location and the amount of traffic, this is an important aspect to consider when making your selection.

A UNIQUE COMPOSITION FOR EXTREMELY DURABLE, EASY TO MAINTAIN FLOORING

Although the structure of the weave makes it appear to have a certain relief element, the exclusive assembly process used by Dickson guarantees it is absolutely waterproof, dustproof and stainproof. The warp and weft yarns are heat-sealed together and assembled to the backing while they are still hot and varnished.

Dickson® woven flooring ensures optimal quality sanitary conditions. Rotproof, antibacterial, and impervious to dust mites, mould spores and fungus, the impermeable surface is strengthened with an integrated overlayer of varnish to make the hygienic maintenance of floors easier and avoid hard-to-remove stains such as coffee, wine, fruit conserve and blood.

ENVIRONMENTALLY

FRIENDLY

AN ENVIRONMENTALLY FRIENDLY COMPANY

Well aware of the environmental stakes, Dickson launched a major campaign under the banner of its GreenOvation initiative. By optimising its energy management, minimising the use of chemical substances and obtaining the ISO 14001 (Environmental Management) - ISO 45001 (Health and Safety at work) - ISO 9001 (Quality Management) - ISO 50001 (Energy Management) certificates and the CAP 26000 (Social Responsibility) label, Dickson has clearly established its position as an eco-friendly business that cares about curbing its environmental footprint as much as possible.

0% PHTHALATE

To improve the well-being of users, air quality and indoor comfort, the woven upper layer of our Dickson floor coverings has always been phthalate-free.

As we believe quality materials play a vital role in their environment, the challenge presented by this new collection for our R&D department was to successfully produce flooring with 0% phthalate - including the bottom layer - and free from plasticizers.

This commitment to remove controversial substances from our new collection reflects Dickson's innovation approach to the environment and complies with European REACH standards.

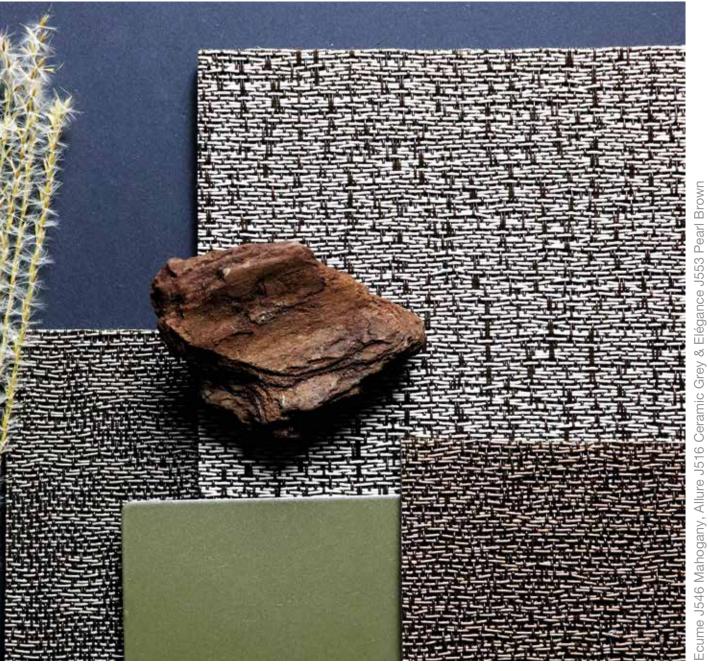

FLOORSCORE CERTIFICATION

Good indoor air quality is essential because people spend most of their lives indoors. The air we breathe affects both our health and our well-being, from minor disturbances, such as odours, skin and eye irritations, to the development or aggravation of more serious ailments, such as respiratory allergies.

Independently tested and certified by the Resilient Floor Covering Institute (RFCI), Dickson® flooring meets the official emissions criteria for volatile organic components (VOC) and is recognized as contributing to good indoor air quality.

A DESIGNER COLLECTION

Drawing on more than one hundred and eighty years of know-how and internationally renowned expertise, Dickson has developed a collection of woven flooring made using revolutionary fibers. The combination of warp and weft yarns on the wear side allows users to create different looks and color nuances for varying perspectives depending on the intensity of the light.

Thanks to a range of available shapes and a palette of unique colors, it has never been easier to create your own style and make your flooring the cornerstone of your decorative scheme in which the floor is the canvas on which you express your creativity and the flooring is a work of art.

INSPIRED BY NATURE

MIRAGE WOVEN FLOORING BY DICKSON

Mirage has a delicately uneven, raw and vibrant surface. A perfect balance between soft and intense, its natural-looking texture is inspired by sisal flooring. This range is available in a broad range of refined colors, from light to dark, with neutral tones complementing more fiery shades.

Our Dickson flooring is composed of PVC-coated woven polyester monofilaments joined to a technically advanced soundproofing underlayer by heat setting and coating. Heat action, central to our production process, fuses each element of our product together for advanced wear resistance and perfect dimensional stability. A subtle amalgam of polymers is discernable on the wear side, but does not alter the quality of our product.

The woven structure also gives added character to the flooring surface and naturally plays with the light. The shape, color and layout give your flooring depth and subtle nuances of color depending on your perspective and the intensity of the light.

www.dicksonflooringproject.com

Each room raises new challenges. That's why our

CONFIGURATOR ALLOWS UNPRECEDENTED SCOPE FOR TESTING AND MODULATING FLOOR SURFACES

From offices to hotels to homes, each space is unique, and so are your design choices. Now available to order in multiple shapes, Dickson Woven Flooring offers countless layout possibilities. Free yourself from standard layouts or complement them by mixing references and shapes to create rhythm, perspectives and reflections to transform interiors.

Allow your imagination free rein by playing with lighting, textures and reflections. With our ranges and their palette of unique colours to choose from, create your own rules and transform your flooring into a design feature.

Your floor becomes

A FORM OF CREATIVITY, FLOORING AN ART FORM.

According to EN 1307 standard

^{*} All our ranges can be combined together for your projects. A slight difference in thickness, due to the different structures of the woven side, is possible and cannot exceed 0.6 mm.

** Dickson flooring is a textile product, composed on the surface of warp threads aligned and associated with weft threads, by the weaving technique. The perfect perpendicularity of the warp and weft threads does not exist. Therefore, woven vinyl floors will always present natural warp and/or weft deformations that will accentuate the authentic appearance of the weave. Recognizing that this natural phenomenon can alter the final aesthetic result beyond a certain limit, Dickson has set a tolerance for all of its woven flooring lines. Weft deformation: Dickson Flooring tolerance limit = 2%. Visual aspect: our Dickson flooring is composed of a weave of PVC-coated polyester monofilaments combined with an acoustic and technical undercoat by heat-setting and coating. The action of heat, at the heart of our production process, allows the different elements of our products to melt together, thus ensuring their resistance to wear and tear and perfect dimensional stability. Thus, the discrete amalgam of polymers can be detected on the wear side without altering the quality of our products in any way. In addition, the woven structure adds character to the look of your flooring and naturally plays with the light. Varying with the shape, colour and layout pattern, the deep and subtle hues of your flooring change according to the lighting and perspective.
